CANADIAN CANCER SOCIETY
DRUMHELLER, ALBERTA

World Day of Prayer Service was held on Friday afternoon, March 5th at 3 p.m. in the United Church. Women from Rosebud, Rockyford, Carbon took part. A vocal selection was rendered by the choir accompanied by Mrs. Sam Garrett. Prayers were led by Mrs. Stewart Hay and responded to by the congregation. The address was read by Mrs. Bruin of Rockyford. The offering was taken by Mrs. Elaine Reid and Mrs. Edith McCracken. After the service a delightful lunch was served by the ladies of the Senior W.A. We extend many thanks to these ladies.

The Students Union presented a very fine Variety Show Monday night, March 1st at Carbon and on Monday night, March 8th at Rosebud. They are to be congratulated on the splendid talent displayed.

Mrs. Torrance returned home on Saturday after spending the past two weeks in Calgary. Accompanying her was her daughter, Marion, who is recovering from a recent illness.

The Junior Ladies' Aid will hold a Sale of Home Cooking and an Apron Sale on Saturday, Mar. 20th at 3 p.m.

Mrs. Sam Garrett and Bob left on Sunday for Toronto where Bob will have a treatment on his foot. We wish Bob a speedy recovery and return.

IN MEMORIAM

In loving memory of our Dad and Grandma who passed away at Carbon March 17:

"Just a memory true and tender, Of one we loved and will always remember."

Rosie and Leslie and Grandchildren.

FOR SALE—Registered Thatcher Wheat. Crop Certificate No. 5887. Germination No. 73-4712, test 94%. \$1.65 bushel.

Registered Newal Barley, Crop Certificate No. 5885. Germination Certificate No. 73-4712, test 95%. \$1.10 bushel.

Baled Crested - Brome - Alfalfa Hay. 60c Bale.

Will trade for wheat, oats or barley.

—Ralph Brown, Acme.

Obituaries

JACK BRIGGS

The funeral for the late Jack Briggs who passed away on Wed., March 3rd was held with full military honors on Saturday at Elnora. He leaves to mourn his loss, his wife, Nellie, three sons and one daughter. Many friends and old-timers attended the funeral.

ADAM OHLHAUSER

Adam Ohlhauser, 53, of Drumheller died Wednesday morning in Drumheller hospital.

He was born in Ashley, North Dakota, coming to Carbon in 1909. During the Second World War he served with the Canadian Artillery.

He was a member of the Canadian Legion at Drumheller and is survived by two sons, Roman and Earl, Carbon; three grandchildren; four brothers, Gottlieb and Jacob, Carbon; Samuel and Julius, Calgary; three sisters, Mrs. Gottlieb Schell, Mrs. Theodora Neher, both of Calgary; Mrs. John Harsch of Carbon.

Rev. D. G. Littlejohns will conduct funeral services Friday at 1 p.m. in Gooder Bros. Funeral Home and burial will be in Mountain View Gardens.

MRS. E. M. SKERRY

Mrs. Eleanor Mary Skerry, 78, of Acme, died Wednesday in the General hospital following a fall at home two weeks ago.

Born in London, England, Mrs. Skerry came to Carbon in 1910, leaving in 1949 to live with her daughter, Mrs. Frank Emery in Acme.

She was predeceased by her husband, Joseph in Carbon in 1937.

Mrs. Skerry was a member of the Anglican Church at Carbon and Acme.

Besides her daughter in Acme, she is survived by another daughter, Mrs. Joseph Raymond of St. Albert; three sons, Frank and Reginald, Calgary, and Wilfred,

Mission City, B.C.; 14 grandchildren; 10 great-grandchildren; two sisters in England.

Rev. G. B. Hotchkis will conduct services Saturday at 2 p.m. in Christ Church, Carbon. Burial will be in Carbon cemetery.

TENDERS FOR SCHOOL HOUSE DRUMHELLER SCHOOL DIVISION No. 30

Sealed Tenders will be received by the Board of Trustees of the above School Division at the office of the Secretary-Treasurer up to noon, March 17, 1954, for the plumbing and propane heating in a two room school to be constructed in the Majestic S.D. No. 2575, after Plan No. ENS-16-53. Plans and specifications may be obtained from the Secretary-Treasurer on payment of a deposit of \$5.00. Plans must be returned within 24 hours, and deposit will then be refunded. A marked cheque for five percent of the amount of tender must be enclosed with each tendered as a

VILLAGE OF CARBON

NOTICE is hereby given that under the provisions of The Tax Recovery Act, the Village of Carbon will offer for sale by public auction at the office of the Secretary-Treasurer, Carbon, Alberta, on Saturday the 24th day of April, 1954 at two o'clock in the afternoon the following parcels in the Village of Carbon:

Lots	Block	Plan
1, 2, 3	28	1313 S
6, 7, 8	28	1313 S

Each parcel will be offered for sale subject to the approval of the Minister of Municipal Affairs, and subject to a reserve bid and to the reservations and conditions contained in the existing Certificates of Title.

Terms cash.

Redemption may be effected by payment of all arrears of taxes and costs at any time prior to the sale.

Dated at Carbon, Alberta this 10th day of February, 1954.

S. F. Torrance,
Secretary-Treasurer.

guarantee that same is bona fide. No tender will be considered without this cheque attached. The lowest or any tender will not necessarily be accepted.

Separate tenders preferred

A. W. POLAND,
Secretary-Treasurer.

1954 OLDSMOBILE SUPER "88" FOUR-DOOR SEDAN

Road-hugging beauty and a smooth ride are characteristic of this latest of Oldsmobiles, the 1954 model, with road height of 60.5 inches as exemplified in this Super "88" four-door sedan. The custom-styled panoramic windshield greatly increases forward vision and helps accent the low contour hood and rear deck. The wraparound windshield gracefully merges with the new keystone-shaped wind vent. The cowl-wide ventilator with stainless steel intake grille improves the heating and fresh air ventilation system, which is incorporated in a compact unit at the rear of the engine compartment. Interior appointments are luxurious, with three upholstery color choices in two types of nylon cloth. Powering the Super "88" is a more powerful 185 h.p. "Rocket" engine with 8.25 to 1 compression ratio. Safety power steering, power brakes, Hydra-Matic Drive, Autronic Eye, two-tone paint, rear wheel fender panels and white wall tires are optional extras.

DUTIES OF ROCK-HEAVERS DESCRIBED

The Lead

The lead is a lowly person who throws the first pair of rocks. Someone has to throw them so they pick on the lead. He should thank his lucky stars that he is even allowed to appear on the ice with other such distinguished personalities. All curlers have served apprenticeship as Leads, and most of them never served long enough. The Lead must address the Skip as "Sir" and the Third Man as "Mister." He must see that all rocks are cleaned before the game, and keep the other members in cigarettes, cigars and matches during the game. First and foremost, he must never talk back. It really doesn't matter if he makes his shot or not he'll be blamed if the game is lost anyway.

The Second

The Second is but one degree removed from the Lead. He must do 75 per cent. of the sweeping, help keep the Third Man in matches. He corrects the Lead's mistakes by trying again to put his rocks where the Skip asked the Lead to put them and didn't. If he sails through the well, he's only the second anyway and what can you expect. He is the only member of the rink who is allowed to insult the Lead, both the Third and Skip consider it beneath their dignity to insult such a minor member. The only time the Skip or the Third Man condescend to speak to the Second is to ask for a match. Yes, he has a pretty tough life, too.

The Third

The Third is, of course, the brains of the rink. He should be a skip, but he magnificently allows the other fellow to think he is boss. Assuming an air of superiority over all Leads and Seconds, he holds the broom for the Skip, and throws dirty looks

at him for missing it. He passes on the Lead's cigarettes to the Skip, together with a lot of unsolicited advice. Everybody knows he should be skipping the rink, he even admits in a quiet way, but labors on with an air of superiority. The chief accomplishment of a Third Man is to be able to convey the impression (by gestures and attitude) that he knew darn well the Skip played the wrong shot when he missed, and if the Skip makes it, why he (the Third) was the bonny boy who figured it out. Yes, he's the Brains of the outfit.

The Skip

The Skip is the goat. He is the gentleman sportsman who neglects his business and sacrifices his valuable time because three others wish the benefit of his skill and experience. He doesn't sweep, this is for lesser members. He holds the broom, and his temper, while his subordinates miss shot after shot. He must be experienced and exercise good judgement in making decisions. He must not blush or appear embarrassed when he hears other members of his rink discussing his failures and short comings with unfeeling spectators. He must never pick the right shots, this would forestall the experts behind the glass. Rocks that only can be seen by whiskers, he must knock out. He must draw to the button, be on the port but inches wide or none at all. He must be able to play dynamite or runner weight with one rock and draw to the button next. He must be able to take out four rocks when there are only three and lie on the button. If he wins, it's a packed rink; if he loses, he's a tramp. Should he accidentally pilot his rink to the big prize in the 'Spell he won't have a friend in the world. Pity the poor old Skip! —The Valley Citizen.

Funny and Otherwise

A little man dashed into a public house and said to the landlord: "A large ginger ale!" He looked shaken, so the landlord asked him what was wrong.

"I just got home to find a strange man kissing my wife!"

"And what did you do?"

"I picked up his umbrella, smashed it across my knee, and said: 'There! I hope it rains!'"

"Have I a licence? Don't be a fool, officer!" said the woman motorist who had just uprooted a lamp-post. "Who'd give me a licence the way I drive?"

"I have a little attachment here for your wireless."

"That's nice of you, old man. What is it?"

"Just a bit of rope and a brick, and the river's the second turning on the right."

"Daddy, did grandpa spank you when you were a little boy?"

"Yes, Johnny."

"And did great-grandpa spank grandpa when he was a little boy?"

"Yes, Johnny."

"Well, don't you think that with my help you could overcome this inherited hooliganism?"

A wealthy man was being bored at lunch by a young man who monopolized the conversation, and finally passed round his sleeve-links for inspection. "Genuine malachite," he said.

"Yes," said the wealthy man. "It's a stone I like. I have several mantelpieces made of the stuff."

Mother: Shirley, be still! Why don't you be nice and quiet like Johnny? He isn't making a sound and you're jumping and screaming.

Shirley: Sure. That's our game. He's daddy coming home late, and I'm you.

By agreement, armies rarely waged war actively in winter in medieval times. 3078

Lodge Takes Over Baseball Tourney At Camrose

CAMROSE, Alta. — Announcement that the Camrose Moose Lodge had taken over the annual baseball tournament here was made recently. The news has been in the air for some time, but negotiations between the Moose and the Camrose Recreation association, earlier sponsors, were not completed until recently.

Already well in hand by the Moose, the tournament will be held

this year in July instead of June, and will not be sandwiched in between the tourneys in Lloydminster and Lacombe. Dates for the new show will be July 6th and 7th.

Heading the committee will be Les. Dodd, and co-chairmen with him are Art. Swaren, Mel West and Gordie Kaser. Secretary of the tournament committee will be Jack Murray, while Eddie Nelson is secretary-treasurer.

The world's largest sandstone quarry is located at South Amherst, Ohio.

Walnut Buttermilk Loaf

Mix and sift twice, then sift into a bowl, 2½ c. once-sifted pastry flour (or 2¼ c. once-sifted all-purpose flour), 2 tsps. Magic Baking Powder, ½ tsp. baking soda, 1½ tsps. salt, ½ tsp. ground mace. Mix in ¾ c. lightly-packed brown sugar, ½ c. rolled oats and 1 c. broken walnuts. Combine 1 well-beaten egg, 1 c. buttermilk, 2 tsps. grated orange rind, 1 tsp. vanilla and 5 tbs. shortening, melted: Make a well in dry ingredients and add liquids; mix lightly. Turn into a loaf pan (4½" x 8½") which has been greased and lined with greased paper. Bake in a rather slow oven, 325°, about 1 hour. Serve cold; thinly sliced and lightly buttered.

CHEESE AND EGG CASSEROLE

3 tablespoons MAZOLA Salad Oil
½ teaspoon salt
1½ tablespoons BENSON'S or CANADA Corn Starch
1½ cups milk
½ cup grated cheese
4 hard-cooked eggs, sliced
2 cups canned peas, drained

COMBINE MAZOLA Salad Oil, salt and BENSON'S or CANADA Corn Starch in saucepan. ADD milk slowly; cook until thick, stir constantly. ADD cheese, continue cooking until cheese melts. ARRANGE hard-cooked eggs and peas in layers in one-quart casserole. POUR cheese sauce over top. BAKE in moderate oven (350°F.) 30 to 35 minutes. YIELD: 4 servings.

Cheese and Egg Plate: COMBINE first 5 ingredients as directed above in top of double boiler. COOK over boiling water until cheese melts. ADD sliced eggs and peas, continue heating 20 to 25 minutes; stir occasionally. SERVE hot on buttered toast; garnish with crisp bacon.

Earth's Sister Planet Mars Comes Close for a Near-Visit

Three photographs of Mars taken during the little sister's last visit some 15 years ago.

By Franklin Johnson
CPC (Correspondent)

Scientists of eight nations caution that you need not expect an invasion of Martians or even the final low down on flying saucers, but they are mobilizing to keep an around-the-clock vigil on the planet Mars during coming months as it makes one of its periodic close calls on the Earth.

Although increasing speculation about space travel undeniably has focussed more than usual attention on the nearer proximity of the only planet believed by some scientists to have life somewhat like ours, the astronomers mainly will be pursuing their own technical interests.

The so-called "Mars committee" consists of astronomers, physicists and meteorologists in the United States, France, Italy, Turkey, India, Japan, Australia and South Africa. These nations occupy the most strategic vantage points for observation.

Preliminary plans for the vigil were laid last October at Flagstaff, Ariz., and will be perfected here this month. Since the Martian "visit" will continue into 1956, the watchers will have a good opportunity to make prolonged studies which could lead to final determination of the riddle of life on the "red planet."

Mars comes nearest the Earth on its elliptical swing around the sun every 15 years. It was on such a "visit" in 1877 that Mars held the rapt attention of Giovanni Schiaparelli at Milan observatory in Italy, and he noticed for the first time the amazing "canals."

His description of this phenomenon, leading to the inevitable speculation that their regular de-

MY FEET ARE KILLING ME!

Accusing the pedal extremities of homicidal intentions is the refuge of the victim of tired and aching feet, frequently the result of ill-fitting shoes. Kicking those shoes off under the seat at the movies doesn't help much, since it is even worse when they are replaced. For anyone who has to do much standing or walking, the footwear should be chosen for comfort, correctly measured and with heels of a suitable height. Shoes that are too tight or heels that do not properly support the foot can be the cause of fatigue and often of pains in other parts of the body. It pays to select shoes carefully.

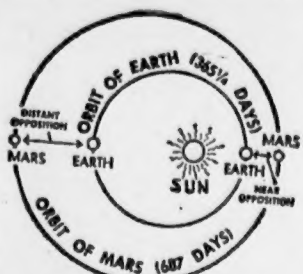

HERE'S HEALTH

Junior loves to play with flare.
He likes to watch it flare.
Unguarded, he himself may maim.
Make sure an adult's there.

Dept. of National Health and Welfare

The smallest island of the Portuguese archipelago of the Azores is Corvo, a name meaning the "sea crow." The island is an extinct volcano crater which rises 300 feet above the Atlantic ocean.

Orbits of Earth and Mars

sign may result from "the work of intelligent beings" so captured the imagination of Percival Lowell, a brilliant and wealthy young American, that he immediately took up astronomy as a life career and dedicated himself to the study of Mars.

Clyde W. Tombaugh, who until recently was on the staff at the big observatory endowed by Lowell, last autumn called upon members of the American Astronomical society at its annual meeting held at the University of Colorado, to utilize the precious months of Mars' current near proximity to make "road maps for interplanetary travellers of the future."

Astronomers regard that as a big assignment, because Mars is only twice the diameter of our moon and the 35 million to 40 million-mile distance even at its closest point leaves something to be desired in neighborliness.

They point out that their most powerful instruments give them a view of the planet which is comparable with that which Galileo, the pioneer Italian scientist, had of the moon when he peered at it with his "optik tube" 3 1/2 centuries ago.

You can get an idea of an astronomer's view of Mars if you train ordinary eight-power binoculars on the moon and try to map it. Adding to the difficulty is the fact that Mars is nearest to the earth when it is at "opposition" to the sun, and the flat light eliminates shadows which greatly aid observations of the terrain.

A German rocket scientist, Wernher von Braun, contends that the "mapping" of Mars is a more practical assignment than many people today realize. He has prepared at the University of Illinois a detailed study of how a round trip could be taken to Mars.

Insisting that he is not dealing in "scientific fiction," Von Braun outlines a project that would cost "no more than a minor military expedition." It envisages a 260-day flight, followed by 400 days of exploration on Mars.

Forty-nine ferry vessels propelled by rockets would take the expedition to a point where it would

become an artificial satellite and would spin around the earth like the moon. From there the "landing ships" to Mars would be spun off in a great circle. He calculates that the fuel needed would cost somewhat more than \$500,000,000.

With the added incentive of these concrete speculations the astronomers during coming months will have more pressure on them than ever before to discover everything they can about conditions on Mars.

They know already that although Mars is only about a tenth the size of the Earth, it has a day about the same as ours (a little more than 24 1/2 hours), and its year is 687 days. It has four seasons which vary in length. Presumably there is snow which makes those intriguing polar ice caps, and some sort of vegetation. Maybe much more.

At the rate things are moving these days, there are scientists who contend that in another 15 years, when Mars hovers near again, the visiting stage may have arrived.

Lauds Benefits Of Irrigation

"Results of irrigation in the Lethbridge district have more than justified the enormous expense," reports Robert Collins, western editor of Maclean's Magazine. In a four-thousand-word article in the current issue of Maclean's, Collins describes how Lethbridge licked the drought.

"The birthplace of Canadian irrigation has become the shopping centre for the richest, most heavily populated agricultural land in the west," Collins says. "This area supports one hundred thousand people and last year produced one hundred and forty million dollars' worth of wheat, sheep, cattle, sugar beets, potatoes, peas, beans, corn and cucumbers."

"During the depression Lethbridge had the highest retail trade of any city its size in the west," the Maclean's article says. "Today its ninety wholesale and five hundred retail firms sell sixty million dollars' worth of clothing, groceries, machinery, electrical appliances and furniture in a year. In 1949 and 1950 Lethbridge had the highest per capita income in Canada."

The gospel of Lethbridge is promoted by citizens like Senator William Buchanan, publisher of the Lethbridge Herald; air-minded businessman Ernest R. McFarland and Harry Hargrave, who stages giant barbecues for two thousand guests, Collins says.

According to Maclean's, Lethbridge's prosperity is analyzed in this way by A. E. Palmer, retired superintendent of the experimental farm: "Suppose a farmer raises 12 tons of beets to the acre on 20 acres and sells them for \$14 a ton. He'll only net about \$1,700. But his gross return is nearly \$3,500 and most of that is spent in Lethbridge."

Drive With Care!

On The Side - By E. V. Durling

Husband-Sitters In Demand

How many nights out should a wife have a week? If her husband has two nights out with the boys, why shouldn't his matrimonial mate have her nights to step out with the girls? That argument recently raged in London. It was finally decided a wife should have a night out. A divorcee, with a sense of humor, then advertised she would be available to act as a "husband sitter" on any wife's night out. She just intended this as a jest. And, so what? She received 44 serious answers from wives who sought her services as "a husband sitter." How about it, lady? Would you enjoy your night out if your spouse was at home with a blonde divorcee acting as "husband sitter?"

One Three-Quarters Of The Time

Again I see it said wives start 85 per cent. of the quarrels among the married. That is an unfair statement. Wives only start about 75 per cent. of the quarrels. Number of domestic battles could probably be decreased if the wives could cease using the word "always" when criticizing their loving husbands. As for examples: "You always leave the bathroom all messed up," "you always want to go home early just when I am enjoying myself," "you're always finding fault with me." And so on and on. And on.

Between Lunch and Dinner

Of all the airlines in the world, which serves the most elaborate free meal for passengers? The plane trip from Paris to London takes one hour and 15 minutes. A returned traveller tells me that on that short trip he was served the following luncheon free of charge: Appetizer, fruit cocktail, boiled eggs in aspic, cold duckling, salad, rolls, butter and bottle of wine. This was followed by cheese, dessert, champagne, coffee and cognac!

Names For Success

Does the girl you are thinking of marrying work in an office? Is she a chain smoker? If so, chances are that she snores. Or, such is the claim of some experts on the subject . . . if your next child is a boy, why not give him a name that might prove a business asset? Call him Alfred Barry Charles. Then his initials will be A.B.C. Suppose, for example, his surname is Daly. Consider the trade value in name of A. B. C. Daly. It's a stand-out! Easy to remember. Almost impossible to forget.

Fast Construction Work

Recently in Hamburg, Germany, a 14-storey apartment house was built in 10 days! This building includes 118 bachelor apartments and 10 family flats. The high speed system by which it was constructed is not a German idea but of Swedish origin.

HEALTH

Spotlight On "Teen" Nutrition Mistakes

There's nothing particularly new in the truism "You Are What You Eat" but most teenagers seem never to have heard of it, according to the findings of a recent mass-survey on nutrition conducted by Pennsylvania State College. The current issue of HEALTH magazine takes a whirl at "teen language" to bring the problem to the attention of those most concerned . . . the teenagers themselves.

Recognizing that teen-age malnutrition isn't always entirely the fault of parents, the "Teen Talk" article gets in some digs at a hypothetical teen-age slob named Theodor P. Fruitless, Theodor, who tries hard to be like the "Big Wheels" or "Good Joes" around school, might almost make the grade if he paid proper attention to the good food set before him. Instead he wastes time and money on soda-fountain appetite killers which he tries to counteract by self-improving nostrums and exercises that seem to "turn into one-way trips on the Streetcar Named Nowhere."

"His teeth are bad, his hair is stringy and looks like a straw-stack and he is profusely blessed with teen-age hickies," says the article, and he gamely experiments with various goos and miracle lotions. He blows his luncheon allowance on body-building courses and collections of timely wisecracks in an effort to cover up his underdevelopment and nervousness and dazzle the local chicks. Still he continues to pick glumly at half-rations of the foods that would solve all his problems for him without benefit of goos, wisecracks or contortions.

The article refers Theodor and his ilk to a clearly constructed chart for teen-agers, which explains precisely which foods are needed for muscle tone, clear skin, poise, growth, glossy hair, good teeth, and other desirable qualities.

GEMS OF THOUGHT

FLATTERY

What drink'st thou oft, instead of homage sweet, But poison'd flattery? —Shakespeare

The same man cannot be both friend and flatterer. —Franklin

Approve not of him who commends all you say. —Franklin

It is difficult to say which may be most mischievous to the human heart, the praise or the dispraise of men. —Mary Baker Eddy

They who delight to be flattered, pay for their folly by a late repentance. —Phaedrus

When flatterers meet, the Devil goes to dinner. —John Ray

CLEAN HANDS

The hands are, of necessity, in constant contact with dirt and bacteria. Disease germs may thus be carried to the mouth unless the hands are carefully washed before handling food. Children should be trained to wash their hands before eating, with special attention to fingerprints. For those who work in public eating places, it is very important that hands be washed frequently. 3078

Choose Stainless Steel Tableware Carefully

BY EDNA MILES

IN a very short time, stainless steel has come out of the kitchen and into the dining room, where it graces the table in company with good china and crystal.

Nearly every housewife has some stainless steel in her kitchen which she uses for stirring or other food preparation. Thus, she wonders how the more expensive stainless (selling for perhaps \$9 a place setting) differs from the cheaper varieties that offer a set for four persons at a mere \$10.

The answer, as always, lies in quality. First, there's a matter of finish. Unlike the inexpensive stainless, the quality stainless has no rough edges and is buffed to bring out the lasting, high luster of the stainless itself.

Many brides-to-be are picking stainless steel as their only tableware in starting out. Later on, they can add sterling, but at the outset they have one good quality set that will serve handsomely both for family and guests.

In shopping for stainless, then, watch for hollow handles on knives and graded pieces. Graded pieces are those tapering in thickness toward the edge of the spoon bowls, handles and tips of fork tines, just as in the best sterling.

Such grading improves the appearance, feel and balance of the tableware. The woman buying stainless should always hold a piece in her hand and inspect it carefully for such qualities.

Stainless is usually most beautiful in very simple designs, but there are a number of patterns on the market today from which the housewife can choose.

Designers no longer translate silver designs into stainless; they design for the stainless itself.

This bride-to-be carefully inspects a stainless steel spoon for finish and grading, two qualities that spell the difference between good tableware and the less expensive variety. The pattern she is inspecting is called "Ballet."

ACCIDENT BEWILDERS FARMYARD—The Academy Hill near North Battleford proved too much recently for this car transport which plowed through the heavy cable highway fence and ended in the farmyard of Bill Zapotiching a few yards from the point No. 4 Highway crosses the Battle River.

"WHERE DID EWE find that animal?" a disbelieving desk officer asks Patrolman Al Amundson at the 100th Police Precinct at Rockaway, Long Island. "I am not trying to pull the wool over your eyes, Amundson replied sheepishly, "but I lassoed it with a skipping rope borrowed from a school girl." Police were called to hunt for the ewe when residents of the district complained of hearing sheep-like noises. The other men at the station couldn't refrain from snickering when the animal was brought in and turned over to the SPCA.

NOT THIS TIME—Dizzy Vance, the great pitcher who won fame with the Brooklyn Dodgers, failed to make baseball's Hall of Fame this year, disappointing many persons, including himself. Above, the immortal star, who was chosen most valuable player in the National League in 1924, winning 28 games, sits with his grandchildren at his home at Homosassa Springs, Fla. His loyal fans are Darryll Oliver Williams, left, and Charles Lucien Williams.

DURING HER forthcoming visit to Malta on her Commonwealth tour, Queen Elizabeth will unveil this memorial to the 2,300 officers and men of the Commonwealth air forces who lost their lives in the Central Mediterranean area during World War II and have no known graves.

SGT.-MAJ. DANNY MCGOWAN of Camp Borden, Ont., pulls out a tray of freshly baked Canadian bread which is being made available to the Canadian army's formation in Germany for the first time. Bread previously supplied to the troops was a heavy type baked by the British army. Sgt.-Maj. McGowan, chief cook with the 2nd Battalion, Royal 22nd Regiment, spent three days with a British supply depot teaching them the method of bread-baking with a Canadian recipe.

TUGBOATS MOVE in to take over after the Spanish ship SS Monte Urquiola broke away from her Thames river moorings and struck the famed London bridge. The vessel blocked river traffic for hours. The bridge was closed to traffic for several hours after the accident.

EXHIBITION ON HOW OIL IS FORMED—These students from White River, Ontario, set a new distance record for organized groups visiting the Royal Ontario Museum at Toronto. On their round trip of more than 1,100 miles they visited the museum and its exhibition on how oil is formed, where it is located and produced in Canada. The exhibition, the first of its kind in Canada, is a joint project of Imperial Oil Ltd. and the Royal Ontario Museum of Geology and Mineralogy. One section of the exhibit is devoted to the cradle of the Canadian oil industry, southwestern Ontario, where oil was first discovered in the 1850's. In this picture Walter M. Tovey, curator of geology, is explaining the operation of a rotary drilling rig. This is the type of rig used in western Canada and recently introduced by Imperial Oil into the Ontario oil fields.

Many Crippled, Handicapped Children Come Under Care of Red Cross

BRENT, age two, is receiving treatment for club feet. He is one of the 164 children given hospital or out-patient care by the Saskatchewan Junior Red Cross last year. In February 1920 the juniors arranged for the treatment of their first patient. During the following 34 years, 6,178 crippled or handicapped children have been helped to better health by medical skill, education and kind treatment.

Care for crippled children is just one part of the work undertaken by Saskatchewan's 118,000 members in 5,261 classrooms. Other projects include help for needy children abroad, the promotion of health and the development of international friendship.

All costs of Junior Red Cross administration are provided for by the Senior Red Cross. This makes it possible to use every cent contributed by children for Crippled Children's Work or Overseas Relief.

The Red Cross on a schoolroom window signifies membership in the Junior Red Cross under the guidance of a Teacher-Director, who is a recognized Red Cross volunteer.

Junior Red Cross is an active young people's organization in 57 countries with meetings properly conducted and members engaged

in studying and carrying out activities related to health rules, good citizenship, serving others and in promoting a better understanding between children of many nations.

Besides the administration of Crippled Children's Work, the Junior Red Cross Headquarters provides materials for the use of the Branches, so that programs may be rich in valuable learning experiences for the youthful members.

This is only one of the many Red Cross services rendered in Canada. One of the most important commitments has been carried on continuously since 1914. It is the work done on behalf of veterans in some 65 hospitals where films are shown on a regular schedule. In many of these hospitals, Red Cross instructors teach arts and crafts, thus assisting with

the re-habilitation of handicapped veterans. Eight lodges close to D.V.A. Hospitals located across Canada, provide recreation, libraries, snacks and over-night accommodations for the next of kin. Approximately 18,000 veterans and 30,000 of their dependents are assisted in one way or another each year.

Disasters have become more frequent in Canada. No one knows where or when another town may be wiped out by fire or threatened by flood. Here in Saskatchewan, Red Cross assisted 400 individuals when 87 homes were destroyed by fire during 1953. While in Canada, there were over 5,000 of some 800 disasters helped. Red Cross provides only emergency needs of clothing, bedding, food, and medicine on the recommendation of local Red Cross representatives.

Any person who is interested in obtaining a complete annual report and financial statement for 1953 of the Society's work in Saskatchewan, may do so by writing the Commissioner, at 2331 Victoria Avenue, Regina, Saskatchewan.

WEEKLY BIBLE COMMENT

ABRAHAM AND JACOB: A CONTRAST

A puzzling and embarrassing incident in the Bible is the story of Abraham's lapse from truthfulness in representing his wife, Sarah, as his sister, when they were confronted by danger in Egypt.

He lied out of fear for his own life and gave no thought to the fate of Sarah.

The incident is so at variance with everything good about Abraham, that one can only regard it as the sort of lapse that sometimes occurs today in the lives of men of good character.

It seems strange to think of a man of faith and courage, the utterer of a high and beautiful prayer, resorting to a cheap lie.

The case of Jacob, Abraham's son, is very different. Jacob, in his early life, at least, does not appear as a good man, lapsing into a temporary act of weakness or evil.

To the contrary, there is in him something fundamentally bad. He is a schemer and trickster, mean and selfish.

But a glimmering of something better appears in his romantic love for Rachel, and he does ultimately give every indication of having become a better man.

However, no glossing over of the evil in the early life of Jacob can make him better than he was. The evil in him was deep. Yet that early evil makes the transformation in his character all the more significant.

Two things stand out boldly as we consider these two men. One, as we think of Abraham, is that no man should be judged by any one incident, or phase, of his life.

Even good men may lapse and fail at times and should be judged only by their whole record

of character, purpose and achievement.

The other, as we think of Jacob, is that no man's character, however evil, is necessarily fixed. Even a bad man may become a good man.

SPRAYING ROADSIDES

ARMSTRONG, B.C. — Spraying of roadsides to control weeds was urged on the British Columbia government by a conference sponsored by the agricultural advisory council here.

Weekly Tip

DUSTLESS DUSTER

To make a dustless duster saturate a piece of cheesecloth in a solution of two tablespoonfuls of kerosene in a quart of hot water. When cold, hang out to dry.

Kitchen Meditations

By JANE DALE

"GOOD LUCK"

We wish them "Good Luck!" But well we know The arduous road Their feet must go.

Before they attain Even small success, It'll be hard labor With courage—no less.

"Good Luck" to many Means Fortune's smile, But to the knowing— A long weary mile!

Improve Your Stickhandling

IF YOU are to score goals or set up scoring plays for a team mate you must be skilful at getting the puck out of your own end, down the ice and into the scoring zone. Here are a few stickhandling tips which will help your puck-carrying ability. The hands and wrists should be kept as loose and easy on the stick as possible with only as much strength used as needed to keep hold of the stick. This will give you a soft "touch" and greater control.

Always keep in mind that relaxed muscles can move more quickly and will respond to your mental commands with more efficiency. The hands should be as high on the stick as possible with the hands as close as the player finds he can keep them. The closer the hands, the greater is the control of the stick.

The puck should be cradled in a spot halfway between the heel and toe of the blade. The blade of the stick must always be kept at right angles to the direction in which the puck is being moved. In very wide patterns the toe of the blade should be turned in a little towards the puck so that it will not slide off the end of the stick. Keeping the elbows well out to the sides, especially the one on the side to which the puck is being moved, and avoiding any

turning of the hands on the stick shaft will keep the blade in proper position.

Rebound Strategy

In Basketball

After you receive the ball on a rebound and your shooting position is not good, look toward the free throw circle to see if a team mate is free. If he is get the ball to him quickly. Too many players try to shoot after taking a rebound, regardless of what their position may be. Don't you make this mistake.

Get Off If Tired!

If you become tired or slowed down by a hard body check, collision or from the accumulated effects of fatigue you should not try to hide the situation just to stay on the playing area. Your obligation is to the team and if you are tired or slowed down you should get off because when in such a condition you represent a weakness in the team.

Some athletes feel that such a strategy indicates a weakness of character and puts them in the "sissy" class. Unless there is a definite reason that forces you to keep going under such circumstances you should get off the playing surface, keeping in mind that courage is only useful when it is used intelligently. 3078

Pioneer of The West Relates Early Days In Alberta

CAMROSE, Alta.—Senior Citizen, Francois, Adam, celebrated his 97th birthday on Sunday, Jan. 24th, and received good wishes and congratulations from his many friends on that honored occasion. Still in good health and spirit, he sat and reminisced of the early days when he first saw this country.

Francois Adam came to this country in the year of 1883 from his native town of Louvain in Belgium, having accepted a position with the C.P.R. as a civil engineer. He worked out of Winnipeg, travelling as far west by train as Medicine Hat. The C.P.R. had just been incorporated, out of the ruins of the bankrupt Transcontinental Railway Company, and, having travelled this far into the

He also had an order in his pocket from the Merchants Bank to construct a building for them on this new street, and he intended also to erect a building of his own on the other corner. He returned home, and received a wire a short time later stating that his proposition had been accepted. That is the story of how Camrose came to have the wide street that the citizens of today are so proud of.

In the Special Immigration Issue, published by The Canadian in 1908, the Townsite of New Norway, on the Tofield to Calgary branch of the Grand Trunk Pacific Railway Company, was put on sale at the offices of Francois Adam. New Norway was born on Thursday, Oct. 14th, 1908, at 10:00 a.m.

Many pages of history of Alberta, Camrose and district have been filled as well as witnessed by Francois Adam in his seventy-one years in Alberta. Some of these pages he helped to write. For instance, in the old history of Camrose written for the 40th Anniversary Edition, it is mentioned

—Photo courtesy of Camrose Canadian.

CELEBRATES 97TH BIRTHDAY—"My nine fur-trading posts were situated about 200 miles north of the present town of Peace River," says Francois Adam, as he describes in detail his early exploits as a fur-trader in 1883. This venerable Camrosian passed his 97th birthday on Sunday, Jan. 24th, marking 71 years in Canada and over 60 years in Camrose. Many pages of history have turned over in Francois Adam's lifetime. He still likes to relate the story of his friendship with Louis Riel, and some of the episodes he witnessed relating to the Rebellion. He is one of the last surviving Fathers of the Town of Camrose, having come here long before the turn of the century.

wilds of the new land, he resigned his position and went up north to engage in the fur industry. He travelled about 200 miles north of the Peace River to Carcajou, where he established fur trading posts, nine in all, and traded in furs and merchandising. Every year when the fur season was finished he took his cargo to London and sold it, then travelled back to Belgium, where he purchased dry goods for his posts.

On his third trip over he met his future wife, brought her back to Canada, and the couple were married by Father Bellevaire, well known in the Duhamel district. Having decided that the life of a fur trader was too hard for a young bride, Francois Adam sold out his posts and took up ranching in Duhamel, the year of 1888. Seven children were born to this union, with son Yvan being the first white boy born in Camrose. Six children are still living, with a Four Generation celebration being realized this year.

It was shortly after this time that he received word that the C.P.R. was contemplating a survey of this country as well as surveying townsites. He journeyed to Winnipeg, where he had connections with the company. He asked them to place the Main Street of Sparling (now Camrose) facing the station, and also requested that they survey this same street a hundred feet wide. He mentioned that he was willing to invest a considerable sum of money, up to a \$100,000 (which was a fortune in those days) in the development of a town, and he would like to know where the street was going.

In 1905, the first election was held in the town, with Francois Adam serving as one of the four overseers of the village, along with F. P. Layton and two others. He was the first Justice of the Peace, and the first President of the Board of Trade, being elected in 1909.

Francois Adam, educated at Louvain, Belgium, was a class mate of Paderewski. He was a friend of Sir Wilfrid Laurier's wife, and a good friend of Louis Riel, being in this part of the country during the Riel Rebellion. He has spent seventy-one years in Canada, and over sixty years in Camrose. Being a civil engineer by profession, he also holds the distinction of building the first wireless set in Camrose. He built many fine residences in Camrose, and in 1908, The Camrose Canadian mentioned that he was "building a large addition to his home on the hill, and will have a fine billiard room when completed." He had his own opinions on why the Indians never contracted a cold, and is noted for saying, "The Indians never washed in the winter, and therefore they never caught colds." He believes in the cause of Louis Riel, and wrote many articles in his defence. In 1908, he hung out another professional card, "Notary Public". He established a lumber yard, sold real estate and was General Agent for the C.P.R., selling farm land and townsites, Agent for the Hudson's Bay Company, Appraiser for the North of Scotland, the Canadian Mortgage Company and the Colonial Investment and Loan Company.

Garden Notes

For Amateur Gardeners

A Boon to the Gardener

Columnists like to poke a little fun at the seed catalogue, with its bright colors and glowing descriptions and coming out in the dead of winter. But these little books are packed with all sorts of vital information and facts. In flowers there is word about heights, color, season of blooming, whether the plants are hardy or tender, or require special light or soil. With vegetables one is given the number of days from seeding to maturity, type, hardiness, spacing and so on. This is essential information in planning and planting. With such knowledge one can arrange flowers so that the smaller plants will be in front and colors will not clash and so one

can get a succession of bloom from early summer on.

This information is needed too, with the vegetables, so that one can select the varieties that are particularly suited to whatever soil and location is available, so that one can get the utmost out of a small plot, and above all a continuous supply of garden fresh vegetables right at the kitchen door.

Informal Is Best

The best garden layout, especially for non-professionals, is the informal one. This does not mean that shrubs, flowers, trees and lawns are put in helter skelter. Far from it. Some of the finest and most costly gardens in all Canada are decidedly in the informal category but into them goes the most precise and long term planning. The famous Butchart Gardens of British Columbia are of the informal type and much of the beautiful grounds around the Canadian side of Niagara Falls, as well as about the Federal Parliament Buildings and the famous driveways of Ottawa.

One doesn't see long straight rows of flowers or square flower beds there. Most of the planting is done in clumps, with sweeping but irregularly shaped lawns as a foreground to massed beds of flowers and groups of shrubbery. And there is a deliberate "opening up" effect. You can't see everything from any central point. Shrubbery, trees and other natural screening is brought forward here and there so that each turn in the path or each rounded corner of lawn reveals another view.

Even in the smallest garden it is usually possible to get this same result even if we only bring a few larger shrubs or flowers forward a bit to screen part of the back, and invite visitors to explore farther.

But Not for Vegetables

All that has been said about informality in the flower garden should be forgotten when it comes to vegetables. Here string-straight rows are essential, not only for neatness, but for getting capacity and for easing cultivation. Usually on the seed packet are precise directions regarding width of rows and spacing. With small things like carrots, beets and lettuce, if necessary, one can have as little as six inches between rows, though at least twice that makes things easier. Beans and peas will require a foot to 18 inches. Potatoes and corn need still more. For economy and interest, trailing or tall things like cucumbers or tomatoes can be grown around the edges of the vegetable plot, and also certain flowers for bouquets like sweet peas and gladiolus.

ANSWERS TO QUICK QUIZ

Answers: 5. Alberta. 3. From natural increase 275,575; from immigration 164,498 (1952). 1. Only the dog. 4. The average hourly wage has increased from 67 cents to \$1.37. 2. In customs duties \$395 million; in sales and excise taxes \$865 million.

Do You Know That ...

One of the fastest of all birds is the peregrine falcon. It has been clocked at speeds of more than 175 miles an hour.

Quick Canadian Quiz

1. Of all our domestic animals, which one was native to this continent?
2. Will we pay more to Ottawa this year in customs duties or in sales and excise taxes?
3. By how much does Canada's population increase in a year from natural increase? From immigration?
4. Since the end of World War II by how much have wages in the manufacturing industries increased on the average?
5. What province still has 30 million acres of unoccupied agricultural land?

IN MANITOBA

Public Speaking Contest Open To 4-H Club Members

A province-wide public speaking contest with conservation as its topic is being sponsored for the seventh consecutive time in Manitoba by the Winnipeg Kiwanis club in co-operation with the Extension Service of the Manitoba Department of Agriculture.

Contestants, who must be over 12 and under 21 years of age and member of a 4-H club, are required to speak on some phases of conservation of natural or human resources: soil, livestock, human resources, wild life, etc.

Entries must be submitted to the local agricultural representative by May 15 and district competitions will be held some time after that date. Those standing first or second in the district contests will be eligible for the final presentation at a meeting of the Winnipeg Kiwanis club July 26.

Generous prizes will be awarded at the district and final contests, it is reported, the value and number to be determined by the number of entries.

Although sugar beets contain less than 20 per cent. sugar, they furnish nearly one half of the world's supply of that commodity.

PEGGY

—By Chuck Thurston

OUR COMPLETE SHORT STORY—

Baby Needs Shoes

By Vincent D. Lunney

SLUGGER BAKER danced around the ring, his hands clasped above his head, acknowledging the scattered applause in the smoke-filled fight club. He hadn't fought for two years and the smell of resin was nectar, but he wasn't happy. He was thinking about his wife. He remembered her voice when he said, "I'm gonna try another fight. Make us fifty or sixty bucks, mebbe."

"But, darling, you've got a job and it might lead to a promotion soon. Why spoil your chances by fighting again? We don't need the money that bad."

He'd looked fondly at Eileen. "Look, honey, you're gonna have a baby. Wouldn't a few extra dollars help?"

"Yes, I suppose it would," she replied. "But I'd rather you wouldn't fight . . . if we need money, I can go back to work at the Acme Beauty Parlor."

He'd interrupted, "Nothin' doin'. Having a baby is a fulltime job."

Pulling himself back to the job in hand, he watched Eddie Waller climbing into the ring. The kid looked good. A nice welterweight. His mind was wavering again. George Gabson, the manager of the fight club, had told him: "Gotta bout for you, Slugger. Waller's green but he'll be on top of the heap some day. If you're ready I'll match you. Fifty bucks . . ."

"Gee, Gabby, that's swell."

" . . . if you lose."

"Lose? I can't do that."

"Suit yourself. You want half a century, don't you? This is a small club. Who's gonna be wise? If you play ball, I'll get you more bouts."

The seconds were working on Slugger getting him ready, but his thoughts were at home again. He remembered how Eileen took the news of his match.

"Think you can win?" she'd asked.

He hadn't the nerve to tell her he was supposed to lose.

The bell clanged. Slugger felt Waller's glove flick to his face. He countered with a left and Waller socked him with a right. Slugger let himself be backed into the ropes. He took an uppercut under his eye. He let the kid hit him again. Better make it look good, he told himself, as the lashing left snapped his head back.

As his seconds administered between rounds, Slugger's eyes swept the crowd. Eileen was in the third row. His pulse quickened. At the sound of the bell he was on his feet.

Slugger absorbed a series of left and rights. The blood flowed freely from the cut and there were red marks on his heaving chest. "I can quit now," he thought. "Just drop to the floor and take the count." An uppercut landed flush on his jaw. The crowd was on its feet as the referee began to count. "One . . . two . . . three . . . four . . ."

Eileen was at the apron of the ring. She was begging him to get up. He smiled feebly. "Sorry, honey, I gotta lose," he muttered. "Five . . . six . . . seven . . ."

The crowd was counting with the referee.

At nine he got to his feet. Above the roar he heard Eileen's voice, "C'mon, Slugger, give it to him."

He smiled. He couldn't afford to win. Eileen needed that fifty dollars.

"C'mon, Slugger, give it to him." Something clicked in Slugger's brain. Maybe it was pride, maybe resentment. He whipped a right into the kid's face and grinned when his opponent squirmed. He lashed out a left and Waller's eyes rolled back. He kept punching until Waller slipped to the floor. An inert figure. Slugger laughed. He felt fine again. He'd conquered Waller and he'd conquered himself.

Slowly Slugger walked through the deserted arena. Gabby had given him a lashing in the dressing room . . . had called him a cheat. All Slugger wanted was to see Eileen. He'd have to tell her that Gabby wouldn't pay him the fifty dollars.

"Slugger!" Eileen took his arm. "We'll have lots of money."

He looked at her fondly and told her the whole story.

Eileen let him finish. "But we have lots of money," she said, "I bet a hundred dollars on you."

"You what? Where'd you get a hundred dollars?"

"I wanted to surprise you," Eileen said. "I've been working every morning for the last two months at the Acme Beauty Parlor. Now promise me one thing . . . no more fights."

"O.K." said Slugger. "No more fights."

(Copyright Wheeler Newspaper Syndicate)

Alberta Holds Large Coking Coal Reserves

EDMONTON.—Alberta has the only large reserves of high-grade coking coal in North America and they will be exploited in the near future, Dr. John Convey of Ottawa, director of the federal mines branch, said here recently.

There is a "very severe" shortage of coking coal — vital in the making of iron and steel — and studies are being made which should result in large-scale developments in the Crow's Nest Pass area, said Dr. Convey.

Main difficulty at present was the fault formations in strata in the Crow's Nest area which resulted in cave-in when drilling took place. A team of physicists, mining engineers and geologists is working on the problem.

Dr. Convey said it is his hope a system can be devised by which the fault formations assist in extraction of the coal.

Referring to competition from oil and natural gas, Dr. Convey said he believes that within 10 years the coal industry in Alberta will be as healthy as ever, if not healthier.

The schipperke, a breed of dog from Belgium, does not have a tail. 3078

ITCH RELIEVED IN A JIFFY
or money back
Very first use of soothing, cooling, liquid D.D.D. Prescription positively relieves raw red itch—caused by eczema, rashes, scalp irritation, chafing—other itch troubles. Greaseless, stainless. 43c trial bottle must satisfy or money back. Ask your druggist for D.D.D. PRESCRIPTION.

3 Dessert Treats from One Basic Dough!

It's easy with wonderful active dry yeast!

NEEDS NO REFRIGERATION!

PREPARE
1½ cups bleached or sulfonated raisins, washed and dried
½ cup finely-cut candied citron
½ cup broken walnuts or pecans

SCALD
2 cups milk
Remove from heat and cool to lukewarm. In the meantime, measure into a small bowl ½ cup lukewarm water
2 teaspoons granulated sugar and stir until sugar is dissolved.
Sprinkle with contents of 2 envelopes Fleischmann's Fast Rising Dry Yeast
Let stand 10 minutes, THEN stir well.
Sift together three times:
4 cups once-sifted bread flour
1 tablespoon salt
4 teaspoons ground cinnamon
½ teaspoon grated nutmeg

BASIC FRUIT DOUGH

¼ teaspoon ground cloves
¼ teaspoon ground mace

Cream in a large bowl
½ cup butter or margarine
½ cup lightly-packed brown sugar

Gradually beat in
1 well-beaten egg

Stir in lukewarm milk, dissolved yeast and sifted dry ingredients; beat until smooth and elastic. Mix in prepared fruits and nuts.

Work in
3½ cups (about) once-sifted bread flour

Turn out on lightly-floured board and knead dough lightly until smooth and elastic. Place in a greased bowl and grease top of dough. Cover and set dough in a warm place, free from draught, and let rise until doubled in bulk. Turn out dough on lightly-floured board and knead lightly until smooth. Divide into 3 equal portions and finish as follows:

Rosetown To Have Pro Ball Team

ROSETOWN, Sask.—After considerable correspondence between a committee of the Rosetown branch of the Canadian Legion and Fred Banks, of Philadelphia, U.S.A., terms have been agreed upon under which the local branch

will sponsor a professional ball team in the Western Baseball League to be known as the "Rosetown Phillies." Mr. Banks will bring the team with him from Philadelphia and will arrive in Rosetown a few days before the league opening.

New electronic aids for the blind were exhibited recently at the University of Michigan.

ON EVEN TERMS

GRANDE PRAIRIE, Alta.—This Alberta town registered a temperature of 48 below zero the other day. On the same day, according to reports from an arctic weather ship, it was 47 below at the North Pole.

There are a few insects that can hear but the greater number, including flies, cannot hear at all.

THE TILLERS

Public Notice

By the Board of Trustees of The Drumheller School Division No. 30 of the Province of Alberta.

WHEREAS it is deemed expedient by the Board of Trustees of the Drumheller School Division No. 30, of the Province of Alberta, that the sum of \$105,000 dollars should be borrowed on the security of the said Division by the issue of Debentures repayable to the bearer in ten equal consecutive annual instalments with interest at the rate of not more than six per centum per annum for the following purposes, namely:

—Build a four room addition to the Trochu Valley School.

THEREFORE, notice is hereby given by the Board of the said School Division that unless a poll of the proprietary electors of the said School Division for and against the said debenture loan is demanded as provided by The School Act, the said Board will apply to the Board of Public Utility Commissioners for authority to borrow the said sum by debentures.

Of which all persons interested are hereby notified, and they are required to govern themselves accordingly.

W. P. HOURIHAN,
Chairman.

Dated at Drumheller

this 5 day of March, 1954.

INSTRUCTIONS TO PROPRIETARY ELECTORS IN A SCHOOL DIVISION

A poll may be demanded in a School Division by a demand signed by five proprietary electors of each of at least twenty per cent of the districts in the division.

Every demand for a poll must be delivered to the Secretary of the Division or District or, in his absence, to the Chairman of the Board of Trustees, within Fifteen days after the date of posting or of the last publication in a newspaper of this notice. A certified copy of the demand must be forwarded forthwith to the Board of Public Utility Commissioners of Alberta at Edmonton.

"Proprietary Elector" means an elector, who is liable to assessment and taxation for school purposes in respect of any property situate in a School Division.

TENDERS FOR SCHOOL HOUSE DRUMHELLER SCHOOL DIVISION No. 30

Sealed Tenders will be received by the Board of Trustees of the above School Division at the office of the Secretary-Treasurer up to noon, March 17, 1954, for the erection of a 1 roomed frame and stucco school building in the Dalum S.D. No. 3969, after Plan No. CNS-6-53. Plans and specifications may be obtained from

BOY SCOUT ACTIVITIES

At 2 p.m. last Saturday the Scouts hopped off the "Carbon Trolley" and entered the hall.

Patrol Leader Bill Mucha hadn't a clue to his future but Mr. Isaac and I had a fair view. Beforehand we cooked up a plot to take Bill uptown to the restaurant after he was fixed up with a damaged scalp, a bleeding forehead, fractured jaw, fractured forearm, fractured upper arm, fractured thigh and fractured

the Secretary-Treasurer on payment of a deposit of \$5.00. Plans must be returned within 24 hours and deposit will then be refunded. A marked cheque for five per cent of the amount of tender must be enclosed with each tender as a guarantee that same is bona fide. No tender will be considered without this cheque attached. The lowest or any tender will not necessarily be accepted.

A. W. POLAND,
Secretary-Treasurer.
Box 570, DRUMHELLER, Alta.
DRUMHELLER SCHOOL
DIVISION No. 30.

calf. It worked, I'm happy to say, and he worked on me after. We talked over camp problems and the cost might rise due to certain circumstances. Don Kary passed some 2nd Class work on Tuesday afternoon, which is for test passing only. Bill, Aaron and I are doing First Class work and deciding what proficiency badges to go for. We found out we can name our patrol so suggestive ideas are welcome. It's up to the boys to pick out of all ideas.

—Arthur Hoivik.

Level Land

Donavon Huether who is attending College at Walla Walla Washington was home for the weekend visiting his parents, Mr. and Mrs. Albert Huether, also a friend, Dean Hiner of Walla Walla is visiting in the district with Don.

Mrs. Emil Berreth was spending a few days in Banff with her daughter and family, Mr. and Mrs. Archie Roth.

Virginia Pangborn and family of Calgary were visiting with Mr. and Mrs. Albert Huether and the S.D.A. Church March 6th.

Safety films were shown in the S.D.A. Church March 6th at 8 p.m. There was a good turnout again. Also a number from west of Acme. I am sure that these programs will help a good many in the future. The films were: "Miracle in Paradise Valley", "X Marks The Spot", "The Torch", "They Didn't Have to Die", "Are You Safe at Home", and "Snow Thrills."

Mr. and Mrs. Joe Stern and Mr. and Mrs. Leonard Lang and Chris Eslinger left Sunday afternoon, March 7th for Jamestown, North Dakota to attend the funeral of Mr. Joe Stern's brother. The sad news was received March 6th.

The S.D.A. Dorcas Society made 41 sheets, laundered and returned them to the Red Cross Crippled Children's hospital. They are also busy doing other work which will be reported later.

The young people of the S.D.A. Church have their week of prayer March 7th. Our choir leader Elmer was in charge on Sunday night, March 7th. Wednesday night Earl Chandler Jr. is in charge and Pastor Cooper is in charge on March 13th.

ALBERTA WHEAT POOL OBJECTIVES AND ACHIEVEMENTS

While Alberta Pool Elevators is an efficient large-scale business enterprise, it is something more.

It is a creation of the agricultural co-operative movement and as such is closely knit to the men and women on the land who believe in the principles of co-operation.

Agricultural co-operation has two sides which, balancing each other, gives the movement strength. One side is the commercial and the other is the social.

The commercial side is to be regarded as the means to the end of improving the living conditions of rural people.

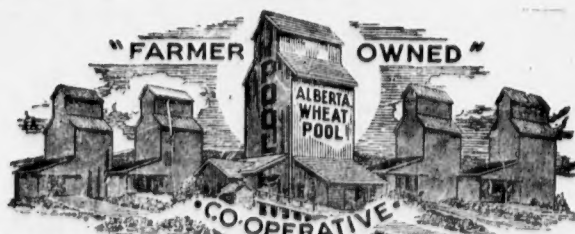

With that objective in view, Alberta Pool Elevators has, over the years, provided surplus earnings to the extent that \$15,390,441 has been distributed to the membership in the form of patronage dividends and redemption of reserves.

In addition reserves to the value of \$9,530,362 have been distributed as patronage dividends.

Furthermore, the operation of Alberta Pool Elevators has kept handling charges low and provided a high standard of service to patrons.

The social purpose of the farm co-operative movement is to raise the cultural standard of farm people and prepare them to assume their full share of responsibility in the nation's economic life.

Every Pool elevator may be said to be a sentinel guarding the interests of the grain producers in that locality. Each one also serves as a link connecting all parts of a great democratic movement working on behalf of the people engaged in Canada's basic industry.

"It's ALBERTA POOL ELEVATORS FOR ALBERTA FARMERS"

ALWAYS LOOK TO IMPERIAL FOR THE BEST

Tractors and farm trucks under heavy load operate under high engine temperatures. That's why Marvelube and Essolube Motor Oils are made to stand up to high temperatures... to resist the formation of acids and engine deposits which cause ring-sticking and wear.

Marvelube or Essolube in gasoline engines... Essolube in your diesel tractor... will give you better performance, longer engine life.

Ask your Imperial Oil Agent about the new 30-gallon non-returnable drum.
